<p>Part1: 1-We stayed at this hotel 2-Breakfast buffet 3-Even though its location was a bit far from the main place, 4-Their service in person was nice; 5-Their service on the phone, on the other hand, was sometimes very curt and dry</p>	<p>Part2: a- very friendly and gentle. b- was always amazing c- for 4 nights during Chinese New Year's week. d-they provide a free shuttle bus near the station e-clean room f- that made me disappointed a little bit.</p>
<p>Answers: 1/... 2/... 3/... 4/.... 5/...</p>	

3-Put the words between parenthesis in the right tense or form: (3.5 marks)

Genetic Engineering holds many promises for the future. It (**bring**) with it possibilities of longer, healthier lives, and possibly near-immortality. It has the possibilities of ending world hunger by making cheaper, (**nutritious**).....and faster growing foods. It could also have the ability (**bring**).....back species from near extinction and even reintroduce (**recent**)..... extinct species back to our world by (**use**)..... old DNA, such as what happened in Jurassic Park. With genetic engineering, we would be able to clone a loved one or a favourite pet, ending the pain of loss that comes from (**die**)..... . On a different level, GE poses a threat to the environment. Much like non-native species easily take over in new environments, GE plants and animals could destroy the environment and (**disorder**)..... the food chain, causing slower-acting but still incredibly long lasting negative effects.

4-Choose the right option : (2.5marks)

Nanotechnology, by definition, is the technology of the very small. Nanotech applies specifically (**about/to/up**) GE by creating new tools to use for manipulation of DNA and gene linking. As the tech advances, things like (**biologist/biology/biological**) computers and mass storage systems will be a reality, and these (**devices/devises/divisions**) depend on GE for their development. Nanotech could allow cheaper production, and also the reduced size of the technology could allow it to (**be produced /produce /have produced**) almost anywhere. It holds the potential to be either the curse or the (**side-effect/blessing/disadvantage**) of our existence.
