DUREE : 2 h COEFFICIENT : 1

1. Ever since I was twelve years old, I've wanted to help people live vibrant and healthy. I have always wanted to be a physician. When I turned 21, however, I was so disenchanted with the medical community that I passed on medicine in favor of working my way around the world for a year. During this journey, I learned that every interaction has the potential to change your perspective on life.

2. After I started working as a research assistant in a hospital, my perspective changed. I walked into Rodney's room frustrated and ready to quit. As I entered his room, he picked up his head, leaned over and told me in a serious tone 'You know what the worst part about this place is ? It's that it is so lonely, depressing and sterile. Hospitals should make you feel good to be alive. They don't. They just suck the life right out of you!' Three weeks later, Rodney died at the age of 38.

3. Last April, I spent two days with Patch Adams, a physician and a professional clown, during his visit to a nearby university. The first time I saw him, he was sitting atop a table wearing fluorescent clown clothes and mismatched purple and green as he spoke to a crowd of students. 'I am building the world's first silly hospital,' he says. For 27 years, Adams has advocated the powerful effects that fun, joy, love and humour have on healing. Adams has made a name for himself in the healing community by challenging traditional medical models.

4. Not willing to practice medicine in a system that he deemed unhealthy, Adams began dreaming about creating his own brand of health care. In 1971, he started the 'wellness' institute providing free care to an estimated 15,000 people. 'I have spoken to doctors all over the world, and the worst illness that they or I have ever seen is not cancer – rather it is the disease of loneliness. Since the early 1970s, Adams has promoted his own special prescription for good health – one that includes love, family, exercise, humour, fun and curiosity.
